COVID-19 VACCINATION

Preparing for COVID-19 vaccination

Make sure your details are correct

Make sure your details are [up to date with Medicare](#). You can do this using either your:

- [Medicare online account](#) through [myGov](#)
- the [Express Plus Medicare app](#).
- calling the [Medicare program](#).

If you don't have your account set up, you can:

- [Enrol in Medicare](#), if you're not already enrolled.
- [Set up](#) your Medicare online account, if you're enrolled in Medicare, but don't have Medicare linked to myGov.
- [Get an Individual Health Identifier \(IHI\)](#), if you're not eligible for Medicare.

Once you've had your vaccine, you'll be able to get an immunisation history statement to prove your vaccination status. You can find out [how to get your immunisation history statement](#) on the Services Australia website.

Getting ready for your appointment

There is a limited supply of COVID-19 vaccines in Australia and globally. This means, people who have the highest risk of severe COVID-19 and/or exposure to the virus will receive the vaccine first. Other people will receive vaccine over time. Find out who will be prioritised for vaccination by visiting www.health.gov.au/covid19-vaccines.

You should **not** attend a COVID-19 vaccination appointment if you:

- Are unwell with fever, cough, runny nose or other symptoms that could be from COVID-19.
- Are awaiting COVID-19 test results.
- Have tested positive with COVID-19 and you are in isolation.
- Are in quarantine.
- Are a close contact of someone with COVID-19.

Plan ahead for two doses

It is important that you receive two doses of your COVID-19 vaccine at least 12 weeks apart. Full protection against COVID-19 will not occur until about a week after your second dose.

What to expect at your vaccination appointment

You should bring the following to your COVID-19 vaccination appointment:

- Medicare card
- Employee ID, if you are getting a COVID-19 vaccine because of your occupation.
- Information about any of your medical conditions, allergies, bleeding disorders or immunocompromise (i.e. weakened immune system).
- Information about any previous COVID-19 vaccine received (vaccine brand and date of vaccination).
- Information about any reactions you have had to any vaccine in the past.
- Name of your current GP/s and any specialist doctors you see.

If you have questions about the COVID-19 vaccine, most can be answered the excellent FAQ website: <https://www.ncirs.org.au/public/covid-19-vaccines>

Brief questions can be answered in the vaccination clinic, however if you do have significant questions about the vaccine you should book an appointment with your GP prior to your vaccination clinic appointment.

Tell your immunisation provider if you have any medical conditions. Especially make sure to tell them if you:

- **Have had anaphylaxis** (a type of severe allergic reaction) to any substance, or if you have an adrenaline autoinjector (e.g. EpiPen).
- Have had **a reaction to any vaccine** in the past.
- Have **a bleeding disorder** or are receiving anticoagulant therapy (a blood thinner).
- Are pregnant, breastfeeding or planning pregnancy.
- Are immunocompromised (i.e. have a weakened immune system or take immune suppressing medication).
- Have received another COVID-19 vaccine (and which brand).
- Have received any vaccine in the last 14 days.

In some circumstances, it may be better to have a discussion with your healthcare provider about vaccination before making an appointment for vaccination.

How you will receive the vaccine

You will receive the vaccine as an injection, most commonly into your upper arm muscle. You must remain in the vaccination clinic for observation for at least 15 minutes after vaccination. Depending on your medical history, you may be asked to wait in the clinic for 30 minutes.

How is the information you provide at your appointment used

For information on how your personal details are collected, stored and used visit <https://www.health.gov.au/covid19-vaccines>
